GET THE FLASH START ADVANTAGE!

SF Sonic presents the full range of storage power solutions manufactured at its state of art factories. The rugged power packed range starts from cars, SUVs, trucks, tractors, construction vehicles, two wheelers and extends to batteries for e-rickshaws, gen-sets, inverters and solar applications. Whatever the application, SF Sonic ensures that you not only get the fail safe reliability of new age technology but also more power per crank, year after year

SF SONIC ADVANTAGES:

- In PSoC (partial state of charge), SF Sonic batteries perform better. This means more assured performance in frequent multiple cranks.
- SF Sonic batteries have SUPERIOR CHARGE ACCEPTANCE. Which means, from the state of PSoC, our batteries recover to full charge quicker.
- In cold conditions, SF sonic batteries' performance is more than adequate and completely dependable.
- The superior power performance of SF Sonic batteries, as detailed above, is the result of a proprietary and homegrown alloy, which is highly corrosion-resistant.

FLASH START SPECIFICATION:

- **Calcium-Silver Alloy:** Increase corrosion resistance and heat tolerance, while reducing bench charging frequency. As a result battery lasts longer and maintains its starting power over time
- **Corrosion resistant Calcium-Calcium grid:** High cranking power, better heat tolerance, and vibration resistance
- **Fully automated terminal post bonding:** Ensure deeper and more consistent bond with dimensional uniformity and lower resistance for longer life
- **Side venting system:** Designed to improve battery safety and prevent corrosive acid spills

OTHER ADVANTAGES:

- Built-in-flame arrestor
- Superior drain-back design
- Improved gas exist profile
- Reduces acid spewing in overcharge
- **Sophisticated design:** Provide improved fitment, particularly in vehicles with sloping hood lines and top hold-downs
